

**California Marine Invasive Species Program
2006 Hull Husbandry Survey**

Part 1: Questionnaire

California's Marine Invasive Species Program is currently sponsoring research on fouling of commercial vessels that visit the state. Your participation on this short 4-question survey will greatly enhance the data gathered through these biological studies.

See accompanying sheet for instructions on filling out this questionnaire.

Vessel Name: _____ IMO: _____

1. When and where was the vessel last dry-docked?

Date (Day/Month/Year): _____

Port or Position: _____ Country: _____

2. When was the hull last coated with an anti-fouling treatment? What type of treatment was applied?

Date anti-fouling treatment was applied (Day/Month/Year): _____

Type of anti-fouling treatment: _____

3. Within the last 6 months, what was the longest amount of time the vessel spent in any single location?

Number of Days: _____ Date of Arrival (Day/Month/Year): _____

Port or Position: _____ Country: _____

4. When and where was the vessel last cleaned in-water?

Date (Day/Month/Year): _____

Port or position: _____ Country: _____

**California Marine Invasive Species Program
2006 Hull Husbandry Survey**

Part 2: Supplementary Instructions for Completing the Questionnaire

Question 1: When and where was the vessel last dry-docked?

List the date (day/month/year) and location when this vessel **most recently** went into dry dock and had its hull cleaned.

Question 2: When was the hull most recently coated with an anti-fouling treatment? What type of treatment was applied?

List the date (day/month/year) during which the vessel's hull was **most recently** treated with a new, complete coat of anti-fouling paint or coating. Include only dates when a coat was applied to the entire hull. Do not list dates when only minor touch-ups were performed. List the type of coating that was applied.

Question 3: Within the last 6 months, what was the longest amount of time the vessel spent in any single location?

List the number of days, location, and date (day/month/year) during which the vessel spent the **longest period laid-over**, between today and six months ago. The date is requested here because fouling accumulation on hulls may be faster or slower depending on season.

Question 4: When and where was the vessel most recently cleaned in-water?

List the location and date (day/month/year) during which the hull **most recently** underwent an in-water hull cleaning.
